# CAN module

## CLARIFICATIONS

**Due to various equipment, some information in particular vehicles may be unavailable.**

ID – car model to be set in CAN module (column available only after NDA agreement)

Car model name and year refers always to model generation, which was introduced (or face-lifted) in given year.

New models and information in this firmware version are **marked in red**.

✓	parameter supported	✓	supported, but may be unavailable if connected via contactless readers
✓ <sub>1</sub>	for fuel level – available both: fuel level and AdBlue level	✓ <sub>2</sub>	value supported, but missing in some vehicles of this model
✓ <sub>2</sub>	for fuel level – available 2 fuel kinds (usually petrol and gas)		electric car – provides battery charge level as fuel level
✓ <sub>n</sub>	for speed - also available output impulse signal (800-2000 pulses per km depending on car model)		
✓ <sub>n</sub>	for total distance - only distance impulses from wheels available (not km from instruments cluster), calibration in target system required		
★	<b>Available under certain conditions, particularly for cars:</b>		
	<b>Dacia Duster (2010-2014)</b> - particular cars might not have CAN-bus and are not supported (it is not known how to determine this in advance, check in the car must be performed)		
	<b>Fiat Doblo (2005-), Ford Fusion (2006-)</b> - unavailable with poor equipment versions and older models (must be determined individually).		
	<b>Mercedes Sprinter (2000-2006)</b> – only if tachograph is installed in a car.		
	<b>Kogel and Krone trailers</b> – with Wabco driver; automatic synchronization not supported (refer to installation manual for details)		
	<b>Opel Astra H (2004-), Opel Vectra C (2002-2008), Opel Zafira (2005-)</b> - for versions 2.0.10 and newer fuel level in this car is calibrated automatically. <b>The car must be tanked full after installation.</b> Until that fuel level will be shown larger than actual.		

	Ignition key		Brake pedal
	„Engine on” signal as „ignition key on”		Reverse gear
	Doors/trunk		Airbags indicator
	Central lock		„Check engine” indicator
	Handbrake		Air conditioning (A/C)
	Running lights / lights indicator		Fuel low indicator
	Low-beams		Clutch pedal
	High-beams		ABS indicator
	Front fog lights		Oil pressure low indicator
	Rear fog lights		Oil level low indicator
	Hazard lights		Manufacture car alarm
	Brake system malfunction / brake fluid low		Engine hot / low coolant level indicator
	Cruise control		Battery indicator
	Driver seatbelt		Service call (also available: distance [km] to technical inspection)
	Parking heater (factory equipment)		Trip counters
	Battery charging (for electric cars)		
	Driver cards numbers from digital tachograph <b>(CAUTION! May be not available if connected via contactless reader)</b>		Driver <b>names and cards numbers</b> and from digital tachograph <b>(CAUTION! May be not available if connected via contactless reader)</b>

\* **Ecodrive parameters column presents number of ecodrive related parameters supported for the car model.**

**It includes** (if appropriate signals are supported for the car model): engine idle time, idle fuel, rapid accelerations, harsh brakings, engine overspeed time, engine effective time, vehicle overspeed time, brake applies, pedal and engine braking ratio, accelerator kick-downs, total accelerator kick-down time, total cruise control drive time (**for details – please refer to Ecodriving Application Note**)

**TERMS OF USE AND LIMITED WARRANTY APPLY (AVAILABLE IN PRODUCER'S NATIVE LANGUAGE).**
